MEN'S SHORTS

—

The Premio EVO Bibshort has been engineered to provide the ultimate in long-distance comfort and to be your favorite bibshort ever. That's a big claim, but there's a lot of research and development in this short to back it up.

The seat pad is central to the Premio's exceptional comfort, and our top-of-the-line Progetto X<sup>2</sup> Air Seamless pad is actually two separate components: a soft, stretchy Skin Care Layer next to your skin, which has the sole purpose of preventing any rubbing on your skin, and, under that, the Cushioning Layer, which features two separate densities of foam along with breathable perforated gel inserts under the ischia bones and perineum.

Comfort continues through the construction of the short, with reduced seams and only three panels. We engineered a new fabric that changes based on the needs of various parts of the body. The lower leg has a raw-cut leg ending and rubberized yarns to guarantee a flat grip to keep the leg in place.

The fabric becomes lighter in the thigh, while the four-way stretch provides just the right amount of muscle support. In the pelvis area, the compression and support increase to keep the seat pad and everything else in place. At the back there's a thicker fabric to prevent any transparency issues.

The premium fabrics extend to the bib straps. The perforated back keeps you cool, and the edge is bonded so you don't feel the thickness of a stitched edge. The elastic straps are soft and stretchy to offer the perfect amount of support without being binding. We've also articulated the straps to spread the load over the shoulders, offering more comfort. The straps narrow as they attach to the short, allowing for greater breathability and eliminating extra fabric on your chest.

We've finished off the Premio EVO Bibshort with subtle logo placement that carries into the rest of our Premio EVO kit for a refined, modern look.

# FREE AERO RACE S BIBSHORT

From your local training route to the world's toughest bike races, the Free Aero Race S Bibshort was developed to meet the demands of the performance cyclist.

When you swing a leg over a bike, the first thing you want out of your bibshorts is comfort. The Forza2 Stretch fabric molds to the body without constriction, allowing the fabric to move with every pedal stroke. The bib straps are kept lightweight and minimal while still being supportive, stretchy, and breathable to maintain a high level of comfort. The silicone grippers at the leg endings keep the short in place right where you want it. And, of course, we've used our Progetto X2 Air Seamless seat pad so you can stay comfortable even on the longest training days.

In the modern world of performance cycling, aerodynamics has quickly become one of the most important components. After countless hours in the wind tunnel, we've aero optimized the bibshort to give you a 3% decrease in CdA, making it the fastest Free Aero Race Bibshort we've ever created. This means every watt you produce can be used to make you go forward faster.

Summers are getting hotter, and for those of us who need to ride at the hottest time of day, during our lunch breaks, we need kit that can help to keep us as cool as possible. The new A/C Bibshort was developed to allow the maximal amount of cooling and breathability while still offering protection from the sun. Everything about this short focuses on keeping you cool.

The sides and leg grippers use a closed mesh for maximal airflow to help cool you and keep you dry. The bib straps are as minimal as possible while still functioning to hold the short in place. The Progetto X<sup>2</sup> Air Seamless seat pad, while providing all-day comfort, dries quickly. Everything about the A/C Bibshort is designed with the one goal of keeping you cool and comfortable on the hottest days.

The next evolution of the suit that started a revolution. Before the Sanremo Speed Suit made its debut in 2011 at Paris-Roubaix, the thought of wearing a speed suit for anything but a time trial seemed insane. But after it achieved victory in its first outing, the way cyclists dressed for racing changed forever. In its latest evolution, the Sanremo S Speed Suit is even faster. The top part uses our newest and fastest Aero Race 8S Jersey with CFD seam placement and engineered ribbed fabric on the sleeves for an aerodynamic advantage. The bottom is based on our new aero-optimized Free Aero Race S Bibshort. As always, the suit opens completely in the front for added ventilation and easier nature breaks and has three pockets on the back for storage. We've also used our Progetto X<sup>2</sup> Air seat pad for comfort during the toughest rides or races.

MEN'S JERSEYS

---

The name says it all.  
The Premio EVO Jersey is designed for  
maximum comfort and performance.  
We've taken the technology and  
fabrics used in the Premio Bibshort  
and adapted them to the jerseys.

Two separate stretch woven fabrics provide numerous benefits: great fit, excellent moisture management, maximum aerodynamics, light weight, durability, and a beautiful smooth finish with a premium feel. The sleeves have a ribbed construction like the Premio short for a snug but not tight fit and an exact color match.

The recycled polyester stretch woven fabric on the body is lightweight, soft, perforated, and stretchy for an outstanding fit. It's excellent at wicking away sweat on those hot days. To finish the Premio Jersey, we've paid close attention to all the little details as well, such as the zipper pull and the gripper elastic. It's the perfect match to your Premio EVO Bibshort.

In the world of performance cycling, we seek out more watts and more speed from our equipment. Dressing for speed is one of the best ways to get faster, since 80% of the drag on a cyclist comes from the body. Drawing on more than a decade of innovation and knowledge in making professional riders faster, the Aero Race 8S Jersey is the result of using the most modern methods and fabrics to create the fastest jersey we've ever made. The S stands for "speed." The sleeve construction uses CFD engineering for optimal seam placement. The engineered ribbed shoulder fabric has been designed specifically for the greatest aerodynamic advantage at race speeds, with a CdA savings of up to 6% over previous aero jerseys. The rest of the jersey is designed for maximum comfort. The body fabric is smooth and stretchy, allowing for a perfect fit, and it feels great against the skin. The elastic at the waist keeps the jersey in place while supporting the three back pockets when they are loaded. The Aero Race 8S Jersey is the ultimate piece of equipment to help you turn your watts into speed.

## WINDPROOFNESS

Front and Back

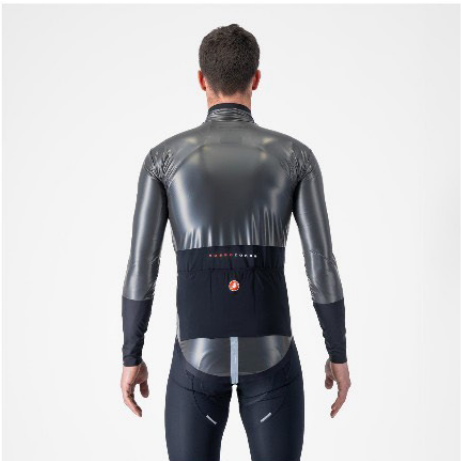

The next generation of Foul Weather Race Equipment has arrived. The Gabba R is more protective and more aerodynamic than ever before. It's made to keep up with the demands of the pro peloton, where every watt counts. It's tested in the wind tunnel as our fastest jacket, so you know you aren't sacrificing any speed in order to stay dry.

Castelli exclusive fabric with a microporous electro-spun hydrophobic polyurethane membrane. The external membrane keeps it light and breathable while avoiding an external textile layer that holds moisture next to the membrane. The fabric weighs just 125gr /m2 and stretches to at least double the original dimension in each direction. The inner fabric backer is 78% polyester / 22% elastane to maintain the extreme stretch while enhancing breathability. The polyurethane membrane has been formulated to be more hydrophobic than standard polyurethane. YKK® Vislon® waterproof zipper. 3 rear mesh pockets for drainage. Drop tail with reflective stripe. The membrane and entire fabrics are PFAS-free.

The Premio EVO W DT Bibshort has been engineered to provide the ultimate in long-distance comfort and to be your favorite bibshort ever. That's a big claim, but there's a lot of research and development in this short to back it up. The seat pad is central to the Premio's exceptional comfort, and our top-of-the-line Progetto X<sup>2</sup> Air Seamless Donna pad is actually two separate components: a soft, stretchy Skin Care Layer next to your skin, which has the sole purpose of preventing any rubbing on your skin, and, under that, the Cushioning Layer, which features two separate densities of foam along with breathable perforated gel inserts under the ischia bones and perineum.

Comfort continues through the construction of the short, with reduced seams and only three panels. We engineered a new fabric that changes based on the needs of various parts of the body. The lower leg has a raw-cut leg ending and rubberized yarns to guarantee a flat grip to keep the leg in place. The fabric becomes lighter in the thigh, while the four-way stretch provides just the right amount of muscle support. In the pelvis area, the compression and support increase to keep the seat pad and everything else in place. At the back there's a thicker fabric to prevent any transparency issues. The premium fabrics extend to the bib straps. In droptail construction, the elastic straps are soft and stretchy to offer the perfect amount of support without being binding. We've finished off the Premio EVO W DT Bibshort with subtle logo placement that carries into the rest of our Premio EVO kit for a refined, modern look.

From your local training route to the world's toughest bike races, the Free Aero Race S W Bibshort was developed to meet the demands of the performance cyclist. When you swing a leg over a bike, the first thing you want out of your bibshorts is comfort. The Forza2 Stretch fabric molds to the body without constriction, allowing the fabric to move with every pedal stroke. The bib straps are kept lightweight and minimal while still being supportive, stretchy, and breathable to maintain a high level of comfort.

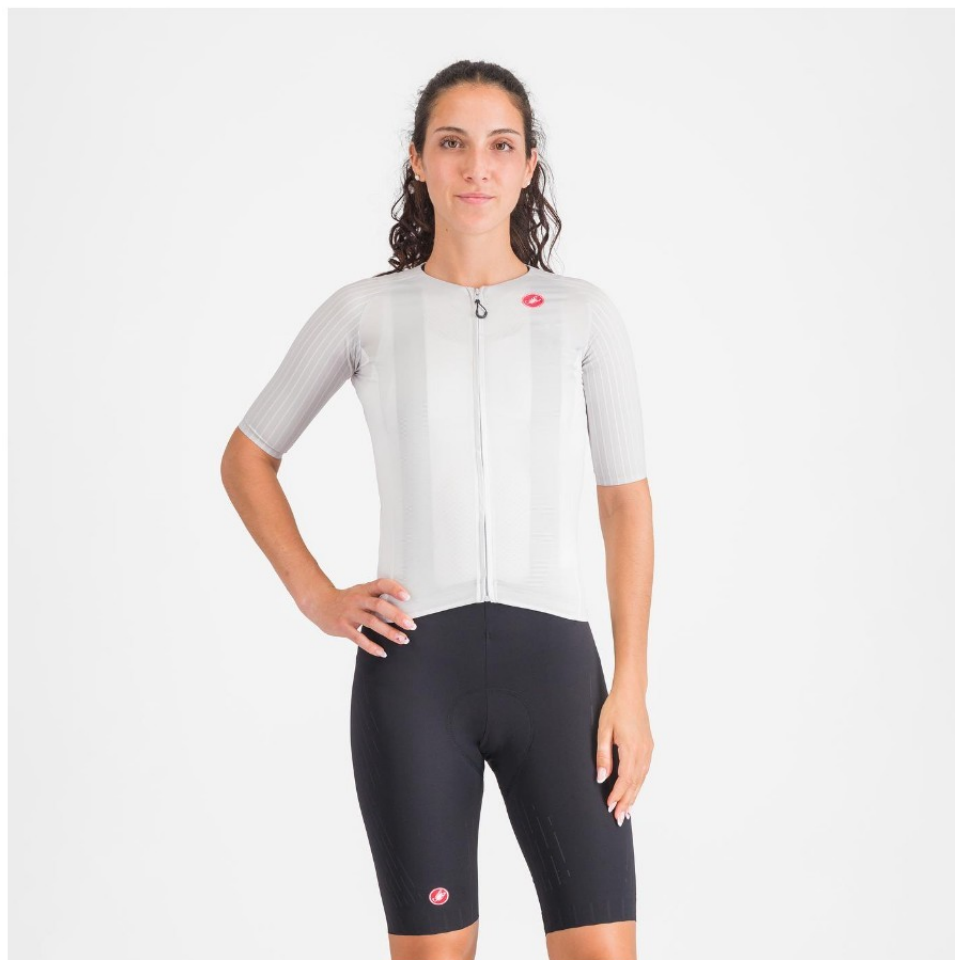

The silicone grippers at the leg endings keep the short in place right where you want it. And, of course, we've used our Progetto X<sup>2</sup> Air Seamless Donna seat pad so you can stay comfortable even on the longest training days. In the modern world of performance cycling, aerodynamics has quickly become one of the most important components. After countless hours in the wind tunnel, we've aero optimized the bibshort to give you a 3% decrease in CdA, making it the fastest Free Aero Race Bibshort we've ever created. This means every watt you produce can be used to make you go forward faster.

WOMEN'S JERSEYS

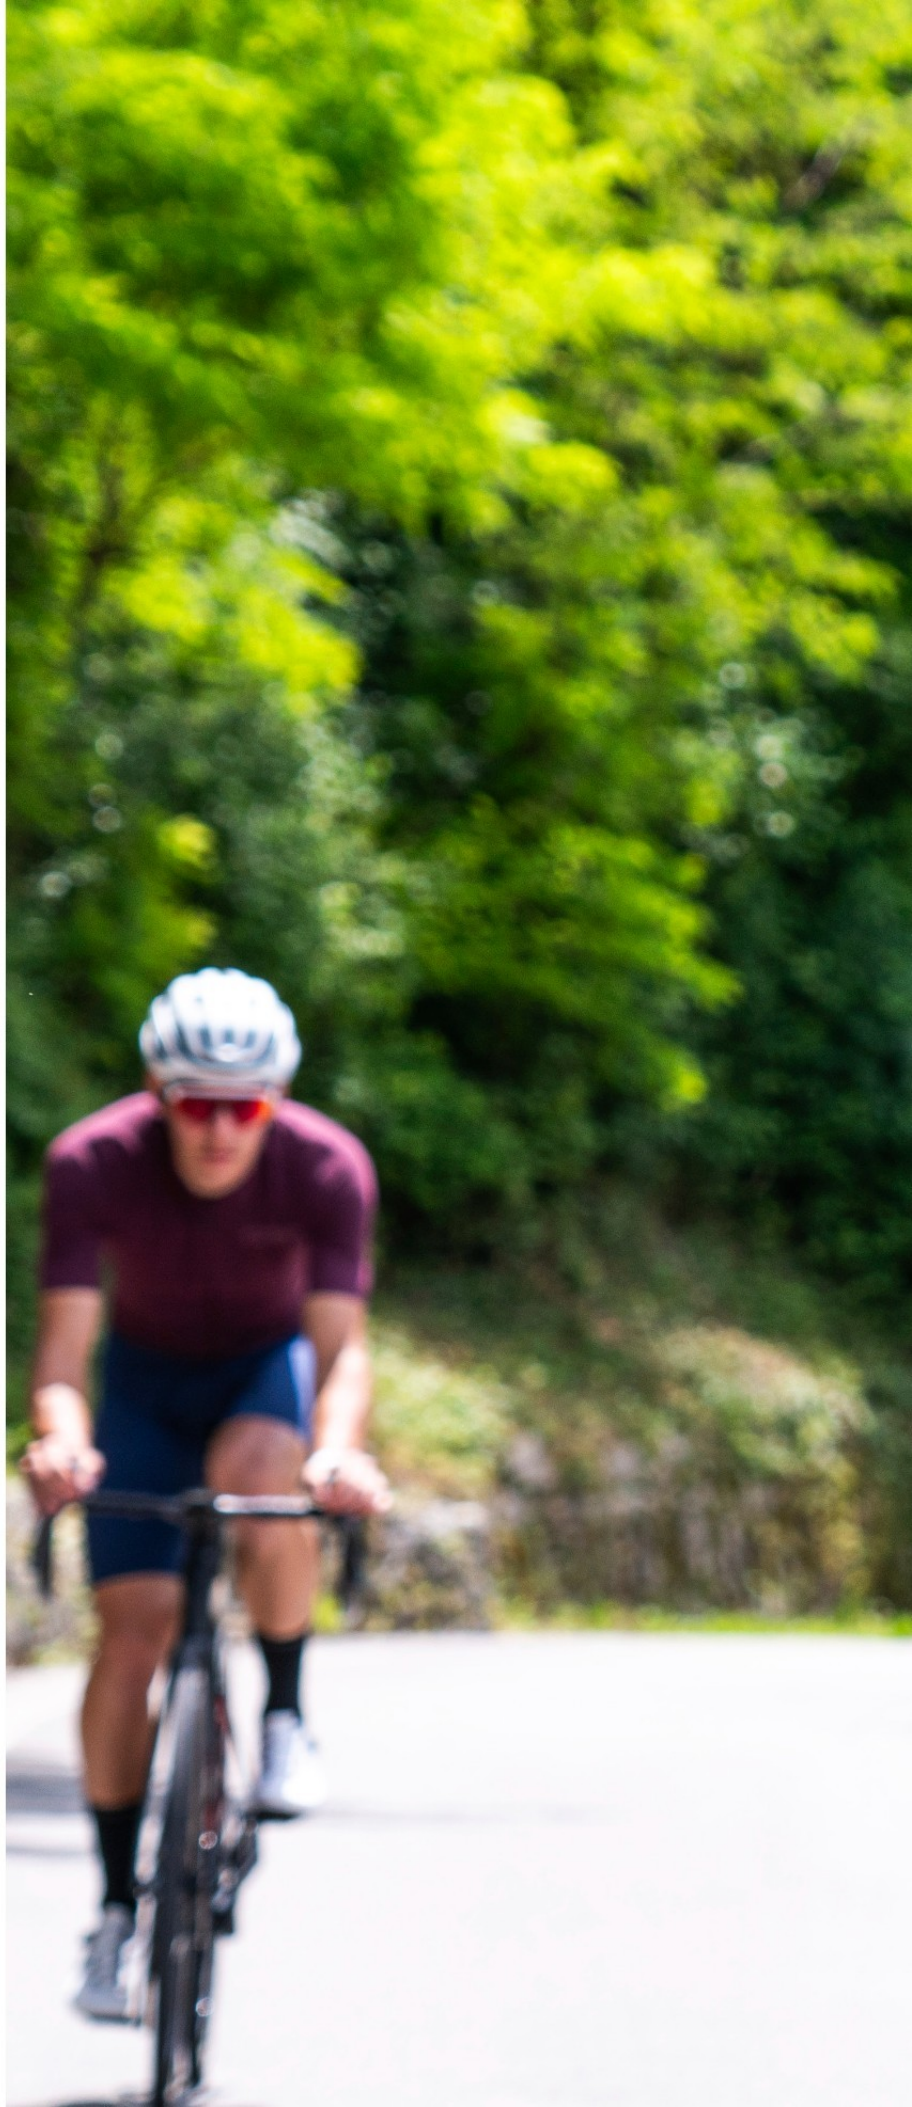

—

The name says it all. The Premio Evo W Jersey is designed for maximum comfort and performance. We've taken the technology and fabrics used in the Premio Bibshort and adapted them into the jerseys. Two separate stretch woven fabrics provide numerous benefits: great fit, excellent moisture management, maximum aerodynamics, light weight, durability, and a beautiful smooth finish with a premium feel. The sleeves have a ribbed construction like the Premio short for a snug but not tight fit and an exact color match. The recycled polyester stretch woven fabric on the body is lightweight, soft, perforated, and stretchy for an outstanding fit. It's excellent at wicking away sweat on those hot days. To finish the Premio Evo W Jersey, we've paid close attention to all the little details as well, such as the zipper pull and the gripper elastic. It's the perfect match to your Premio EVO W DT Bibshorts.

In the world of performance cycling, we seek out more watts and more speed from our equipment. Dressing for speed is one of the best ways to get faster, since 80% of the drag on a cyclist comes from the body. Drawing on more than a decade of innovation and knowledge in making professional riders faster, the Aero Race 8S W Jersey is the result of using the most modern methods and fabrics to create the fastest jersey we've ever made.

The S stands for "speed." The sleeve construction uses CFD engineering for optimal seam placement. The engineered ribbed shoulder fabric has been designed specifically for the greatest aerodynamic advantage at race speeds, with a CdA savings of up to 6% over previous aero jerseys.

The rest of the jersey is designed for maximum comfort. The body fabric is smooth and stretchy, allowing for a perfect fit, and it feels great against the skin. The elastic at the waist keeps the jersey in place while supporting the three back pockets when they are loaded. The Aero Race 8S W Jersey is the ultimate piece of equipment for helping to turn your watts into speed.

» RISTRETTO

» RACE CORE

The next generation of Foul Weather Race Equipment has arrived. The Gabba R is more protective and more aerodynamic than ever before. It's made to keep up with the demands of the pro peloton, where every watt counts. It's tested in the wind tunnel as our fastest jacket, so you know you aren't sacrificing any speed in order to stay dry.

Castelli exclusive fabric with a microporous electro-spun hydrophobic polyurethane membrane. The external membrane keeps it light and breathable while avoiding an external textile layer that holds moisture next to the membrane. The fabric weighs just 125gr /m2 and stretches to at least double the original dimension in each direction. The inner fabric backer is 78% polyester / 22% elastane to maintain the extreme stretch while enhancing breathability. The polyurethane membrane has been formulated to be more hydrophobic than standard polyurethane. Stretch wrist closure to keep water out. YKK® Vislon® waterproof zipper. 3 rear mesh pockets for drainage. Drop tail with reflective stripe. The membrane and entire fabrics are PFAS-free.

Front and Back

This is the original jacket/jersey that started an entire new product class: the Gabba. It's a water-resistant short-sleeve jacket that's equally ideal for dry conditions. Made to be worn with our Nano Flex arm warmers, it allows you to keep your core warm without overheating.

The 5th generation of the Gabba, from the inventors of the Gabba

Now more water-resistant than ever  
Castelli-exclusive GORE-TEX INFINIUM™  
WINDSTOPPER® 205 Warm brushed water-resistant fabric on front-facing surfaces

GORE-TEX INFINIUM™ WINDSTOPPER® 203 Stretch on rear-facing surfaces for greater stretch and breathability

Taped shoulder seams for extra rain protection  
Top- and bottom-opening YKK® Vislon® zipper for easy sliding, covered for additional wind and rain protection

3 rear pockets

Reflective panel at bottom of pockets

**KISS TRI**
**PREMIO CORSA**

Evolution of the record-breaking PR Speed Suit. Premio-based short portion for exceptional comfort and improved aerodynamics, especially in crosswind conditions. CFD and in-depth wind tunnel testing create the fastest triathlon racing suit, optimized for high speeds.

Made to be the fastest option for half- and long-distance triathlons

Significant aero benefits on the bike while providing comfort and cooling on the run

Premio-based short portion for seamless comfort and outstanding aerodynamics

50-denier upper-body fabric is the thinnest, smoothest fabric for light weight and maximum aerodynamics

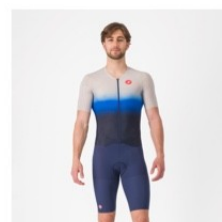

Active cooling for the run, with moisture evaporating directly next to the skin

Silicone speed ribs on the sleeves induce turbulence to reduce drag on one of the most exposed parts of the body

Elbow-length sleeves and knee-length legs for maximum aerodynamics

2 rear pockets for ample nutrition storage

KISS TRI KISS CORSE

Evolution of the record-breaking PR Speed Suit. Premio-based short portion for exceptional comfort and improved aerodynamics, especially in crosswind conditions. CFD and in-depth wind tunnel testing create the fastest triathlon racing suit, optimized for high speeds.

Made to be the fastest option for half- and long-distance triathlons  
Significant aero benefits on the bike while providing comfort and cooling on the run  
Premio-based short portion for seamless comfort and outstanding aerodynamics  
50-denier upper-body fabric is the thinnest, smoothest fabric for light weight and maximum aerodynamics  
Active cooling for the run, with moisture evaporating directly next to the skin  
Silicone speed ribs on the sleeves induce turbulence to reduce drag on one of the most exposed parts of the body  
Elbow-length sleeves and knee-length legs for maximum aerodynamics  
2 rear pockets for ample nutrition storage  
KISS Tri pad

**KISS TRI** ROBIC CORSE

A true evolution of our best-selling suit  
CFD-based fabric placement and seam construction  
Engineered ribbed fabric on sleeves and shoulders to reduce drag at race speeds, with significant savings in CdA

Internal neck pocket for ice to keep body temperature down in hottest conditions

Bonded sleeve endings for comfort

Lightweight body fabric for optimal cooling, breathability, and comfort

2 rear pockets lie flat and prevent nutrition from bouncing around

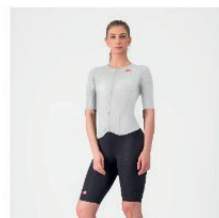

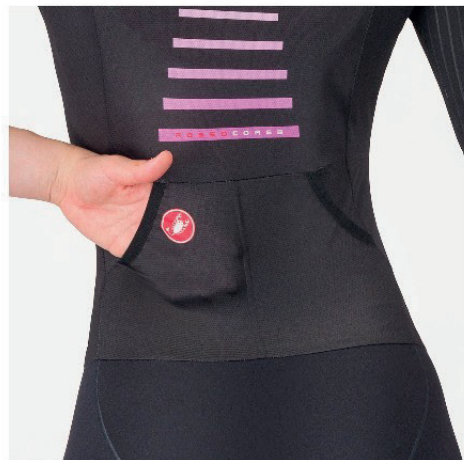

Castelli's Sanremo front opening makes it easier to bend for cycling and straighten out for the run and swim, while also allowing for added ventilation on extra-hot runs

Leg portion in aero-optimized Forza2 Stretch fabric for maximum comfort and aerodynamic advantage

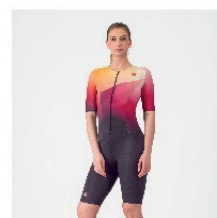

Silicone leg grippers to keep leg endings in place

KISS Tri seat pad that provides comfort on the bike and that you almost don't feel during the run

**PROGETTO X<sup>2</sup>**  
SEAMLESS

Pro-level seat pad for maximum comfort. New seamless skin-care layer is softer against the skin and reduces abrasion. Separate saddle-shaped cushioning layer with progressive damping through high-density foam and gel inserts.

**KISSair<sup>2</sup>**

High-performance seat pad for all conditions. Single-piece construction with infinitely variable thickness. Updated with more supportive padding and a softer, stretchier fabric next to the skin.

**KISSTRI**

Specifically designed for the triathlete. Minimum bulk doesn't get in the way during the swim and run legs. Extra fast drying foam prevents chafing on the bike.
